Art Unit: 3682

The drawings were received on June 22, 2005. These drawings are approved.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 14 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Popa et al.

The bearing of Popa includes a rolling element (66), a lubricant (column 2, line 65), and a seal (e.g. 22, 29, in Figure 1), a hole (36) in the seal and a gas-permeable membrane (40) substantially covering the hole in the seal for allowing the bearing internal pressure to equalize with the external pressure.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 3682

Claims 3-5, and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Popa et al. It would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize the bearing taught by Popa in any environment requiring pressure equalization, including that of a pressurized vessel. With respect to claim 4 and 15, it would have been obvious to one of ordinary skill in the art to modify the hole opening of Popa to any desired diameter.

Applicant's arguments filed June 22, 2005 have been fully considered but they are not persuasive. With respect to claims 14 and 16, Applicant states "Popa's vent includes a membrane as part of the vent but the hole in the seal is formed in the membrane itself." As noted in the rejection above the seal member is indeed formed with a hole, with the membrane covering the hole. Applicant alleges "lubricant may escape through Popa '379's pressure relief hole since the hole is not covered by a gas permeable membrane." However, as noted above the hole is indeed covered by the gas permeable membrane 40.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 3682

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
